

Contents

1	Diversity of <i>Distoseptispora</i> (Distoseptisporaceae) taxa on submerged decaying wood from the Red River in Yunnan, China Hong-Wei Shen, Dan-Feng Bao, Saranyaphat Boonmee, Yong-Zhong Lu, Xi-Jun Su, Yun-Xia Li, Zong-Long Luo
29	New species of <i>Tropicoporus</i> (Basidiomycota, Hymenochaetales, Hymenochaetaceae) from India, with a key to Afro-Asian <i>Tropicoporus</i> species Sugantha Gunaseelan, Kezhocuyi Kezo, Samantha C. Karunarathna, Erfu Yang, Changlin Zhao, Abdallah M. Elgorban, Saowaluck Tibpromma, Malarvizhi Kaliyaperumal
55	Morphology and multigene phylogeny reveal three new species of <i>Distoseptispora</i> (Distoseptisporales, Distoseptisporaceae) on palms (Arecaceae) from peatswamp areas in southern Thailand Omid Karimi, K. W. Thilini Chethana, Antonio R. G. de Farias, Raheleh Asghari, Saithong Kaewchai, Kevin D. Hyde, Qirui Li
83	Identification of two new species and a new host record of <i>Distoseptispora</i> (Distoseptisporaceae, Distoseptisporales, Sordariomycetes) from terrestrial and freshwater habitats in Southern China Xue-Mei Chen, Xia Tang, Jian Ma, Ning-Guo Liu, Saowaluck Tibpromma, Samantha C. Karunarathna, Yuan-Pin Xiao, Yong-Zhong Lu
107	Three new <i>Pyrenula</i> species with 3-septate ascospores with red or orange oil when over-mature (Ascomycota, Pyrenulales, Pyrenulaceae) from China Mingzhu Dou, Shengnan Liu, Jiechen Li, André Aptroot, Zefeng Jia
127	Additional four species of <i>Tatraea</i> (Leotiomycetes, Helotiales) in Yunnan Province, China Cui-Jin-Yi Li, Kandawatte Wedaralalage Thilini Chethana, Prapassorn Damrongkool Eungwanichayapant, De-Qun Zhou, Qi Zhao
155	Phylogeny of the genus <i>Loxospora</i> s.l. (Sarrameanales, Lecanoromycetes, Ascomycota), with <i>Chicitea</i> gen. nov. and five new combinations in <i>Chicitea</i> and <i>Loxospora</i> Łucja Ptach-Styn, Beata Guzow-Krzemińska, James C. Lendemer, Tor Tønsberg, Martin Kukwa
183	Three novel species of <i>Aquapteridospora</i> (Distoseptisporales, Aquapteridosporaceae) from freshwater habitats in Tibetan Plateau, China Rong-Ju Xu, Jun-Fu Li, De-Qun Zhou, Saranyaphat Boonmee, Qi Zhao, Ya-Ya Chen
201	Diversity, pathogenicity and two new species of pestalotioid fungi (Amphisphaeriales) associated with Chinese Yew in Guangxi, China Yifeng Wang, Kin-Ming Tsui, Shimei Chen, Chongjuan You
225	Two new species of <i>Diaporthe</i> (Diaporthaceae, Diaporthales) associated with <i>Camellia oleifera</i> leaf spot disease in Hainan Province, China Hong Y. Liu, Dun Luo, Han L. Huang, Qin Yang
245	Two new species and one new combination of <i>Ophiocordyceps</i> (Hypocreales, Ophiocordycipitaceae) in Guizhou Xing-Can Peng, Ting-Chi Wen, De-Ping Wei, Yu-Hong Liao, Yi Wang, Xian Zhang, Gui-Ying Wang, Yun Zhou, Khanobporn Tangtrakulwanich, Jian-Dong Liang
267	Morphological and molecular analyses reveal two new species of <i>Grifola</i> (Polyporales) from Yunnan, China Song-Ming Tang, De-Chao Chen, Shuai Wang, Xiao-Qu Wu, Cheng-Ce Ao, Er-Xian Li, Hong-Mei Luo, Shu-Hong Li
285	Two novel species of arctic-alpine lichen-forming fungi (Ascomycota, Megasporeaceae) from the Deosai Plains, Pakistan Muhammad Usman, Paul S. Dyer, Matthias Brock, Christopher M. Wade, Abdul Nasir Khalid
301	Two new species of Sordariomycetes (Chaetomiaceae and Nectriaceae) from China Hai-Yan Wang, Xin Li, Chun-Bo Dong, Yan-Wei Zhang, Wan-Hao Chen, Jian-Dong Liang, Yan-Feng Han
317	Corrigendum: Hu H et al. (2023) Taxonomic and phylogenetic characterisations of six species of Pleosporales (in Didymosphaeriaceae, Roussoellaceae and Nigrogranaceae) from China. MycoKeys 100: 123–151. https://doi.org/10.3897/mycokeys.100.109423 Hongmin Hu, Minghui He, Youpeng Wu, Sihan Long, Xu Zhang, Lili Liu, Xiangchun Shen, Nalin N. Wijayawardene, Zebin Meng, Qingde Long, Jichuan Kang, Qirui Li

Grifola edulis S.M. Tang & S.H. Li, sp. nov.

For those who want their work rapidly known to the World !

FOCUS AND SCOPE

MycoKeys is a peer-reviewed, open-access, rapidly disseminated journal launched to accelerate research and free information exchange in taxonomy, phylogeny, biogeography, evolution and ecology of Fungi (incl. lichens). **MycoKeys** aims to apply the latest trends and methodologies in publishing and preservation of digital materials to meet the highest possible standards of the cybertaxonomy era. **MycoKeys** will publish papers on the monophyletic kingdom Fungi containing taxonomic or ecological data on any taxon of any geological age from any part of the world with no limit to manuscript size.

MycoKeys will consider for publishing works on the following topics:

- descriptions of new taxa, if they are accompanied with proper diagnoses, keys and/or distinction from close relatives or similar taxa
- taxonomic revisions of extant (or "recent") and fossil plant groups
- checklists and catalogues
- phylogenetic and evolutionary analyses
- papers in descriptive and/or historical biogeography
- methodology papers
- data mining and literature surveys
- monographs, conspecti, atlases
- collections of papers, Festschrift volumes, conference proceedings

Papers containing **identification keys** will be accepted with priority. Extensive manuscripts consisting mostly of keys will be considered for publishing as well.

ISBN numbers will be assigned to large monographic papers (i.e., major revisions of taxa), monographs, collections of papers, Festschrift volumes, atlases, checklists, conspecti.

All content is Open Access distributed under the terms of the *Creative Commons Attribution License*, which permits unrestricted use, distribution, and reproduction in any medium, provided the original author and source are credited. Authors are thus encouraged to post the pdf files of published papers on their homepages or elsewhere to expedite distribution.

AUTHOR GUIDELINES

Authors are kindly requested to submit their manuscript *only* through the online submission module at <https://mycokeys.pensoft.net>. In case of difficulties with the submission procedure, please contact mycokeys@pensoft.net. Full text of author guidelines is available at: <http://mycokeys.pensoft.net/about#AuthorGuidelines>

EXCERPTS FROM THE GUIDELINES

BODY TEXT. All papers must be in English, checked by a native English-speaking colleague (if author(s) is/are not native English speaker(s)). Write with precision, clarity, and economy: use the active voice and first person whenever appropriate.

WEB (HTML) LINKS. Authors may include links to other Internet resources in their article. This is especially encouraged in the reference section. When inserting a reference to a webpage, please include the **http://** portion of the address.

CITATIONS WITHIN THE TEXT. Citations within the text: Before submitting the manuscript, please check each citation in the text against the **References** and vice-versa to ensure that they match exactly. Citations in the text should be formatted as follows: Smith (1990) or (Smith 1990), Smith et al. (1998) or (Smith et al. 1998) and (Smith et al. 1998, 2000; Brock and Gunderson 2001; Felt 2006).

REFERENCES. It is important to format the references properly, because all references will be linked electronically as completely as possible to the papers cited. It is desirable to add a **DOI** (digital object identifier) number for either the full-text or title and abstract of the article as an addition to traditional volume and page numbers. If a DOI is lacking, it is recommended to add a link to any online source of an article. Please use the following style for the reference list:

Published Papers: Smith AR, Pryer KM, Schuettpeiz E, Korrall P, Schneider H, Wolf PG (2006) A classification for extant ferns. *Taxon* 55(3): 705–731.

Accepted Papers: Same as above, but "in press" appears instead the year in parentheses.

Electronic Journal Articles: Agosti D, Egloff W (2009) Taxonomic information exchange and copyright: the Plazi approach. *BMC Research Notes* 2: 53. <https://doi.org/10.1186/1756-0500-2-53>

Paper within conference proceedings: Kress WJ, Specht CD (2005) Between Cancer and Capricorn: phylogeny, evolution, and ecology of the tropical Zingiberales. In: Friis I, Balslev H (Eds) *Proceedings of a symposium on plant diversity and complexity patterns – local, regional and global dimensions*. Biologiske Skrifter, The Royal Danish Academy of Sciences and Letters, Copenhagen, 459–478.

Book chapters: Mayr E (2000) The biological species concept. In: Wheeler QD, Meier R (Eds) *Species Concepts and Phylogenetic Theory: A Debate*. Columbia University Press, New York, 17–29.

Books: Heywood VH, Brummitt RK, Culham A, Seberg O (2007) *Flowering Plant Families of the World*. Kew Publishing, 1–424.

Book with institutional author: International Commission on Zoological Nomenclature (1999) *International code of zoological nomenclature*. Fourth Edition. London: The International Trust for Zoological Nomenclature.

PhD thesis: Stahlberg D (2007) *Systematics, phylogeography and polyploid evolution in the *Dactylorhiza maculata* complex* (Orchidaceae). PhD Thesis, Lund University, Sweden.

CITATIONS OF PUBLIC RESOURCE DATABASES: It is highly recommended all appropriate datasets, images, and information to be deposited in public resources. Please provide the relevant accession numbers (and version numbers, if appropriate).

Examples of such databases include, but are not limited to:

- IPNI (www.ipni.org)
- Morphbank (www.morphbank.net)
- Genbank (www.ncbi.nlm.nih.gov/Genbank)
- BOLD (www.barcodinglife.org)

Providing accession numbers to data records stored in global data aggregators allows us to link your article to established databases, thus integrating it with a broader collection of scientific information. Please hyperlink all accession numbers through the text or list them directly **after the References** in the online submission manuscript.

INTERNATIONAL CODE OF NOMENCLATURE FOR ALGAE, FUNGI, AND PLANTS. **MycoKeys** will publish papers that strictly adhere the rules of the last edition of the *International Code of Nomenclature for algae, fungi, and plants*. Descriptions of new taxa (species and below) should include the following: 1) a short Latin diagnosis followed by a full description in English, 2) an illustration (line drawing or photograph) clearly showing the diagnostic characters, 2) a comparison of the new taxon with related taxa, a diagnostic key to identification of species-group members, or at least to the closest relatives is highly desirable and may be requested by the editors 3) a discussion of the distinctive morphological characteristics, ecology, geography, and/or reproductive biology, and 4) a statement on preliminary [at least] conservation status for the taxon being described.

OPEN ACCESS FEES. Publication fees in open access journals ensure a barrier-free distribution of your paper at no charge for the readers and include costs involved in processing, formatting, publishing, indexing and archiving your paper.

The journal charges Open Access Publication Fee of EURO 15 per page for papers of less than 100 printed pages. Please visit the "Discounts and Waivers" section at <http://www.pensoft.net/journals/mycokeys> to learn more of our discount and waiver policies.

PRINTED VERSION. Offprints and printed issues of the journal can be purchased additionally (see journal's website). For standing orders/subscriptions please contact the Managing Editor.
