

Contents

1	The diversity and taxonomy of <i>Tomentella</i> (Thelephoraceae, Thelephorales) with descriptions of four new species from Southwestern China <i>Xiaojie Zhang, Fulei Shi, Ke Yang, Changlin Zhao</i>
31	Morphological and molecular identification of two new <i>Marasmiellus</i> species (Omphalotaceae, Agaricales) from Thailand <i>Wenhua Lu, Pumin Nutaratat, Jaturong Kumla, Saowaluck Tibpromma, Abdallah M. Elgorban, Samantha C. Karunaratna, Nakarin Suwannarach</i>
49	Mitogenomics, phylogeny and morphology reveal two new entomopathogenic species of <i>Ophiocordyceps</i> (Ophiocordycipitaceae, Hypocreales) from south-western China <i>Tao Sun, Yue Chen, Dong Wang, Yongdong Dai, Weiqiu Zou, Run Luo, Quanying Dong, Hong Yu</i>
73	Morphological characteristics and phylogenetic analyses revealed two new species from China and a new record from Jilin Province of Agaricales <i>Di Zhang, Jun-Jie Peng, Jia-Jun Wang, A. K. Hasith Priyashnatha, Jin-Peng Liao, Hua-Xing Luo, Shi-Chen Huang, Ji-Ze Xu</i>
91	<i>Chlorocillium sinense</i> sp. nov. (Clavicipitaceae) and <i>Calcarisporium guizhouense</i> sp. nov. (Calcarisporiaceae) in Hypocreales from China <i>Wan-Hao Chen, Dan Li, Jian-Dong Liang, Xiu-Xiu Ren, Jie-Hong Zhao, Yan-Feng Han</i>
109	Addition of three new species of <i>Xylariomycetidae</i> fungi on bamboo from Southern China <i>Xin Zhou, Kamran Habib, Wenyu Zeng, Yulin Ren, Xiangchun Shen, Jichuan Kang, Qirui Li</i>
131	A high species diversity of <i>Lyomyces</i> (Basidiomycota, Hymenochaetales) in Central and South America, revealed after morphological and molecular analysis <i>Eugene Yurchenko, Ewald Langer, Janett Riebesehl</i>
171	Two new species of <i>Pholiota</i> (Agaricales, Strophariaceae) from the southwest of China <i>Jia-hui Huang, Chun-yu Lei, Ya-lun Shen, En-jing Tian</i>
187	Three novel Ascomycota (Saccharomycetes, Saccharomycetales) yeast species derived from the traditional Mexican alcoholic beverage Pulque <i>Chunyue Chai, Dan Lu, Jinli Liu, Eentao Wang, Xuemei Han, Fengli Hui</i>
207	Morphological and phylogenetic analyses reveal eight novel species of <i>Pestalotiopsis</i> (Sporocadaceae, Amphisphaeriales) from southern China <i>Xing-Xing Luo, Ming-Gen Liao, Kai Zhang, Rafael F. Castañeda-Ruíz, Jian Ma, Zhao-Huan Xu</i>
239	Two new species of <i>Parastagonospora</i> and a new species of <i>Phaeoseptoriella</i> (Phaeosphaeriaceae, Pleosporales) from grasslands in Yunnan Province, China <i>Ying Gao, Tingfang Zhong, Prapassorn Damrongkool Eungwanichayapant, Ruvishika S. Jayawardena, Kevin D. Hyde, Turki Kh. Faraj, Dhanushka N. Wanasinghe, Heng Gui</i>
265	New <i>Helminthosporium</i> (Massarinaceae, Dothideomycetes) and <i>Nigrospora</i> (Incertae sedis, Sordariomycetes) species associated with walnut (<i>Juglans regia</i> L.) in China <i>Mengting Zou, Fatimah Al-Otibi, Kevin David Hyde, Yong Wang, Xue-Jun Pan</i>
285	Unveiling species diversity within early-diverging fungi from China I: three new species of <i>Backusella</i> (Backusellaceae, Mucoromycota) <i>Heng Zhao, Yong Nie, Bo Huang, Xiao-Yong Liu</i>
305	Two new species of <i>Cytospora</i> (Diaporthales, Cytosporaceae) causing canker disease of <i>Malus domestica</i> and <i>M. sieversii</i> in Xinjiang, China <i>Guifang Cai, Ying Zhao, Yawei Zhai, Meilin Yan, Rong Ma, Daoyuan Zhang</i>
319	Morpho-molecular analysis of two new species <i>Deconica</i> and <i>Entocybe</i> in Agaricales from Mount Tianmu, China <i>Yu-Yu Shen, Zi-Wen Zhang, Wen-Qian Li, Xing-Ning Liu, Fei-Ying Tian, Chun-Mei Pang, Wen-Hong Dai, Yao-Bin Song, Ming Dong</i>
337	Three new wood-inhabiting fungi of <i>Botryobasidium</i> (Cantharellales, Basidiomycota) from subtropical forests of Southwestern China <i>Lin-Jiang Zhou, Xue-Long Li, Hai-Sheng Yuan</i>

Pholiota cylindrospora E.J. Tian, sp. nov.

FOCUS AND SCOPE

MycoKeys is a peer-reviewed, open-access, rapidly disseminated journal launched to accelerate research and free information exchange in taxonomy, phylogeny, biogeography, evolution and ecology of Fungi (incl. lichens). **MycoKeys** aims to apply the latest trends and methodologies in publishing and preservation of digital materials to meet the highest possible standards of the cybertaxonomy era. **MycoKeys** will publish papers on the monophyletic kingdom Fungi containing taxonomic or ecological data on any taxon of any geological age from any part of the world with no limit to manuscript size.

MycoKeys will consider for publishing works on the following topics:

- descriptions of new taxa, if they are accompanied with proper diagnoses, keys and/or distinction from close relatives or similar taxa
- taxonomic revisions of extant (or "recent") and fossil plant groups
- checklists and catalogues
- phylogenetic and evolutionary analyses
- papers in descriptive and/or historical biogeography
- methodology papers
- data mining and literature surveys
- monographs, conspecti, atlases
- collections of papers, Festschrift volumes, conference proceedings

Papers containing **identification keys** will be accepted with priority. Extensive manuscripts consisting mostly of keys will be considered for publishing as well.

ISBN numbers will be assigned to large monographic papers (i.e., major revisions of taxa), monographs, collections of papers, Festschrift volumes, atlases, checklists, conspecti.

All content is Open Access distributed under the terms of the *Creative Commons Attribution License*, which permits unrestricted use, distribution, and reproduction in any medium, provided the original author and source are credited. Authors are thus encouraged to post the pdf files of published papers on their homepages or elsewhere to expedite distribution.

AUTHOR GUIDELINES

Authors are kindly requested to submit their manuscript *only* through the online submission module at <https://mycokeys.pensoft.net>. In case of difficulties with the submission procedure, please contact mycokeys@pensoft.net. Full text of author guidelines is available at: <http://mycokeys.pensoft.net/about#AuthorGuidelines>

EXCERPTS FROM THE GUIDELINES

BODY TEXT. All papers must be in English, checked by a native English-speaking colleague (if author(s) is/are not native English speaker(s)). Write with precision, clarity, and economy: use the active voice and first person whenever appropriate.

WEB (HTML) LINKS. Authors may include links to other Internet resources in their article. This is especially encouraged in the reference section. When inserting a reference to a web-page, please include the **http://** portion of the address.

CITATIONS WITHIN THE TEXT. Citations within the text: Before submitting the manuscript, please check each citation in the text against the **References** and vice-versa to ensure that they match exactly. Citations in the text should be formatted as follows: Smith (1990) or (Smith 1990), Smith et al. (1998) or (Smith et al. 1998) and (Smith et al. 1998, 2000; Brock and Gunderson 2001; Felt 2006).

REFERENCES. It is important to format the references properly, because all references will be linked electronically as completely as possible to the papers cited. It is desirable to add a **DOI** (digital object identifier) number for either the full-text or title and abstract of the article as an addition to traditional volume and page numbers. If a DOI is lacking, it is recommended to add a link to any online source of an article. Please use the following style for the reference list:

Published Papers: Smith AR, Pryer KM, Schuettelpelz E, Korall P, Schneider H, Wolf PG (2006) A classification for extant ferns. *Taxon* 55(3): 705–731.

Accepted Papers: Same as above, but "in press" appears instead the year in parentheses.

Electronic Journal Articles: Agosti D, Egloff W (2009) Taxonomic information exchange and copyright: the Plazi approach. *BMC Research Notes* 2: 53. <https://doi.org/10.1186/1756-0500-2-53>

Paper within conference proceedings: Kress WJ, Specht CD (2005) Between Cancer and Capricorn: phylogeny, evolution, and ecology of the tropical Zingiberales. In: Friis I, Balslev H (Eds) *Proceedings of a symposium on plant diversity and complexity patterns – local, regional and global dimensions*. Biologiske Skrifter, The Royal Danish Academy of Sciences and Letters, Copenhagen, 459–478.

Book chapters: Mayr E (2000) The biological species concept. In: Wheeler QD, Meier R (Eds) *Species Concepts and Phylogenetic Theory: A Debate*. Columbia University Press, New York, 17–29.

Books: Heywood VH, Brummitt RK, Culham A, Seberg O (2007) *Flowering Plant Families of the World*. Kew Publishing, 1–424.

Book with institutional author: International Commission on Zoological Nomenclature (1999) *International code of zoological nomenclature*. Fourth Edition. London: The International Trust for Zoological Nomenclature.

PhD thesis: Stahlberg D (2007) *Systematics, phylogeography and polyploid evolution in the Dactylorhiza maculata complex* (Orchidaceae). PhD Thesis, Lund University, Sweden.

CITATIONS OF PUBLIC RESOURCE DATABASES: It is highly recommended all appropriate datasets, images, and information to be deposited in public resources. Please provide the relevant accession numbers (and version numbers, if appropriate).

Examples of such databases include, but are not limited to:

- IPNI (www.ipni.org)
- Morphbank (www.morphbank.net)
- Genbank (www.ncbi.nlm.nih.gov/Genbank)
- BOLD (www.barcodinglife.org)

Providing accession numbers to data records stored in global data aggregators allows us to link your article to established databases, thus integrating it with a broader collection of scientific information. Please hyperlink all accession numbers through the text or list them directly **after the References** in the online submission manuscript.

INTERNATIONAL CODE OF NOMENCLATURE FOR ALGAE, FUNGI, AND PLANTS. **MycoKeys** will publish papers that strictly adhere the rules of the last edition of the *International Code of Nomenclature for algae, fungi, and plants*. Descriptions of new taxa (species and below) should include the following: 1) a short Latin diagnosis followed by a full description in English, 2) an illustration (line drawing or photograph) clearly showing the diagnostic characters, 2) a comparison of the new taxon with related taxa, a diagnostic key to identification of species-group members, or at least to the closest relatives is highly desirable and may be requested by the editors 3) a discussion of the distinctive morphological characteristics, ecology, geography, and/or reproductive biology, and 4) a statement on preliminary [at least] conservation status for the taxon being described.

OPEN ACCESS FEES. Publication fees in open access journals ensure a barrier-free distribution of your paper at no charge for the readers and include costs involved in processing, formatting, publishing, indexing and archiving your paper.

The journal charges Open Access Publication Fee of EURO 15 per page for papers of less than 100 printed pages. Please visit the "Discounts and Waivers" section at <http://www.pensoft.net/journals/mycokeys> to learn more of our discount and waiver policies.

PRINTED VERSION. Offprints and printed issues of the journal can be purchased additionally (see journal's website). For standing orders/subscriptions please contact the Managing Editor.
