

Contents

1	Taxonomic study of <i>Hydnoporia</i> (Hymenochaetales, Hymenochaetaceae) in East Asia with two new species Minseo Cho, Yoonhee Cho, Sun Lul Kwon, Dohye Kim, Kentaro Hosaka, Young Woon Lim, Jae-Jin Kim
21	Molecular phylogeny and morphology of the genus <i>Fuscoporia</i> (Hymenochaetales, Basidiomycota) and reveal three new species of the <i>F. ferrea</i> group Qian Chen, Han Chen, Cheng-Hang Luo, Xiao-Hong Lai
41	Four new species of <i>Phanerochaete</i> (Polyporales, Basidiomycota) from China Kai-Yue Luo, Xin Zhang, Yu-Cheng Dai, Yuan Yuan
65	<i>Melomastia</i> (Dothideomycetes, Ascomycota) species associated with Chinese <i>Aquilaria</i> spp. Tian-Ye Du, Samantha C. Karunarathna, Saowaluck Tibpromma, Kevin D. Hyde, Somrudee Nilthong, Ausana Mapook, Xiang-Fu Liu, Dong-Qin Dai, Chen Niu, Abdallah M. Elgorban, Ekachai Chukeatirote, Hao-Han Wang
87	Three new microfungi (Ascomycota) species from southern China Duhua Li, Mengyuan Zhang, Jinjia Zhang, Liguu Ma, Zhaoxue Zhang, Jie Zhang, Xiuguo Zhang, Jiwen Xia
111	Two new species and a new record of Hypoxylaceae (Xylariales, Ascomycota) from Mexico Pamela E. Reyes, Juan Pablo Pinzón, Ricardo Valenzuela, Tania Raymundo, Juan Tun-Garrido, Ricardo García-Sandoval
129	Multigene phylogeny, taxonomy, and potential biological properties of <i>Pseudorousoella</i> and <i>Neorousoella</i> species (Rousoellaceae, Dothideomycetes) from Asteraceae weeds in northern Thailand Zin Hnin Htet, Kevin D. Hyde, Fatimah O. Alotibi, Thilini K. W. Chethana, Ausana Mapook
147	Taxonomic novelty in Pleomonodictydaceae and new reports for <i>Ampelomyces quisqualis</i> (Phaeosphaeriaceae), <i>Melomastia maolanensis</i> and <i>M. oleae</i> (Pleurotremataceae) Digvijayini Bundhun, E. B. Gareth Jones, Ruvishika S. Jayawardena, Erio Camporesi, Dhanushka N. Wanasinghe, Indunil C. Senanayake, Vinodhini Thiyagaraja, Kevin D. Hyde
181	Assigning <i>Xiuguozhangia</i> (genus incertae sedis) to Pseudoberkleasmiaceae (Dothideomycetes, Pleosporomycetidae, Pleosporales) and introducing <i>X. broussonetiae</i> as a novel species Deeksha Gomdola, Rajesh Jeewon, Eleni Gentekaki, Ruvishika S. Jayawardena, Kevin D. Hyde, Fatimah Alotibi, Yong Wang
211	Emended Neodactylariales (Dothideomycetes): <i>Szaferohypha</i> gen. nov. and phylogenetically related genera Marcin Piątek, Monika Stryjak-Bogacka, Paweł Czachura
229	Molecular phylogeny and morphology reveal three new plant pathogenic fungi species (Septobasidiales, Basidiomycota) from China Qianquan Jiang, Zhengli Kang, Xubo Wang, Changlin Zhao

MycoKeys 111 ♦ 2024

A peer-reviewed open-access journal
MycoKeys
Launched to accelerate biodiversity research

Pestalotiopsis solicola D.H. Li, Z.X. Zhang, J.W. Xia & X.G. Zhang, sp. nov.

FOCUS AND SCOPE

MycoKeys is a peer-reviewed, open-access, rapidly disseminated journal launched to accelerate research and free information exchange in taxonomy, phylogeny, biogeography, evolution and ecology of Fungi (incl. lichens). **MycoKeys** aims to apply the latest trends and methodologies in publishing and preservation of digital materials to meet the highest possible standards of the cybertaxonomy era.

MycoKeys will publish papers on the monophyletic kingdom Fungi containing taxonomic or ecological data on any taxon of any geological age from any part of the world with no limit to manuscript size.

MycoKeys will consider for publishing works on the following topics:

- descriptions of new taxa, if they are accompanied with proper diagnoses, keys and/or distinction from close relatives or similar taxa
- taxonomic revisions of extant (or "recent") and fossil plant groups
- checklists and catalogues
- phylogenetic and evolutionary analyses
- papers in descriptive and/or historical biogeography
- methodology papers
- data mining and literature surveys
- monographs, conspecti, atlases
- collections of papers, Festschrift volumes, conference proceedings

Papers containing **identification keys** will be accepted with priority. Extensive manuscripts consisting mostly of keys will be considered for publishing as well.

ISBN numbers will be assigned to large monographic papers (i.e., major revisions of taxa), monographs, collections of papers, Festschrift volumes, atlases, checklists, conspecti.

All content is Open Access distributed under the terms of the *Creative Commons Attribution License*, which permits unrestricted use, distribution, and reproduction in any medium, provided the original author and source are credited. Authors are thus encouraged to post the pdf files of published papers on their homepages or elsewhere to expedite distribution.

AUTHOR GUIDELINES

Authors are kindly requested to submit their manuscript *only* through the online submission module at <https://mycokeys.pensoft.net>. In case of difficulties with the submission procedure, please contact mycokeys@pensoft.net. Full text of author guidelines is available at: <http://mycokeys.pensoft.net/about#AuthorGuidelines>

EXCERPTS FROM THE GUIDELINES

BODY TEXT. All papers must be in English, checked by a native English-speaking colleague (if author(s) is/are not native English speaker(s)). Write with precision, clarity, and economy: use the active voice and first person whenever appropriate.

WEB (HTML) LINKS. Authors may include links to other Internet resources in their article. This is especially encouraged in the reference section. When inserting a reference to a web-page, please include the **http://** portion of the address.

CITATIONS WITHIN THE TEXT. Citations within the text: Before submitting the manuscript, please check each citation in the text against the **References** and vice-versa to ensure that they match exactly. Citations in the text should be formatted as follows: Smith (1990) or (Smith 1990), Smith et al. (1998) or (Smith et al. 1998) and (Smith et al. 1998, 2000; Brock and Gunderson 2001; Felt 2006).

REFERENCES. It is important to format the references properly, because all references will be linked electronically as completely as possible to the papers cited. It is desirable to add a **DOI** (digital object identifier) number for either the full-text or title and abstract of the article as an addition to traditional volume and page numbers. If a DOI is lacking, it is recommended to add a link to any online source of an article. Please use the following style for the reference list:

Published Papers: Smith AR, Pryer KM, Schuettpeiz E, Korall P, Schneider H, Wolf PG (2006) A classification for extant ferns. *Taxon* 55(3): 705–731.

Accepted Papers: Same as above, but "in press" appears instead the year in parentheses.

Electronic Journal Articles: Agosti D, Egloff W (2009) Taxonomic information exchange and copyright: the Plazi approach. *BMC Research Notes* 2: 53. <https://doi.org/10.1186/1756-0500-2-53>

Paper within conference proceedings: Kress WJ, Specht CD (2005) Between Cancer and Capricorn: phylogeny, evolution, and ecology of the tropical Zingiberales. In: Friis I, Balslev H (Eds) *Proceedings of a symposium on plant diversity and complexity patterns – local, regional and global dimensions*. Biologiske Skrifter, The Royal Danish Academy of Sciences and Letters, Copenhagen, 459–478.

Book chapters: Mayr E (2000) The biological species concept. In: Wheeler QD, Meier R (Eds) *Species Concepts and Phylogenetic Theory: A Debate*. Columbia University Press, New York, 17–29.

Books: Heywood VH, Brummitt RK, Culham A, Seberg O (2007) *Flowering Plant Families of the World*. Kew Publishing, 1–424.

Book with institutional author: International Commission on Zoological Nomenclature (1999) *International code of zoological nomenclature*. Fourth Edition. London: The International Trust for Zoological Nomenclature.

PhD thesis: Stahlberg D (2007) *Systematics, phylogeography and polyploid evolution in the Dactylorhiza maculata complex (Orchidaceae)*. PhD Thesis, Lund University, Sweden.

CITATIONS OF PUBLIC RESOURCE DATABASES: It is highly recommended all appropriate datasets, images, and information to be deposited in public resources. Please provide the relevant accession numbers (and version numbers, if appropriate).

Examples of such databases include, but are not limited to:

- IPNI (www.ipni.org)
- Morphbank (www.morphbank.net)
- Genbank (www.ncbi.nlm.nih.gov/Genbank)
- BOLD (www.barcodinglife.org)

Providing accession numbers to data records stored in global data aggregators allows us to link your article to established databases, thus integrating it with a broader collection of scientific information. Please hyperlink all accession numbers through the text or list them directly **after the References** in the online submission manuscript.

INTERNATIONAL CODE OF NOMENCLATURE FOR ALGAE, FUNGI, AND PLANTS. **MycoKeys** will publish papers that strictly adhere the rules of the last edition of the *International Code of Nomenclature for algae, fungi, and plants*. Descriptions of new taxa (species and below) should include the following: 1) a short Latin diagnosis followed by a full description in English, 2) an illustration (line drawing or photograph) clearly showing the diagnostic characters, 2) a comparison of the new taxon with related taxa, a diagnostic key to identification of species-group members, or at least to the closest relatives is highly desirable and may be requested by the editors 3) a discussion of the distinctive morphological characteristics, ecology, geography, and/or reproductive biology, and 4) a statement on preliminary [at least] conservation status for the taxon being described.

OPEN ACCESS FEES. Publication fees in open access journals ensure a barrier-free distribution of your paper at no charge for the readers and include costs involved in processing, formatting, publishing, indexing and archiving your paper.

The journal charges Open Access Publication Fee of EURO 15 per page for papers of less than 100 printed pages. Please visit the "Discounts and Waivers" section at <http://www.pensoft.net/journals/mycokeys> to learn more of our discount and waiver policies.

PRINTED VERSION. Offprints and printed issues of the journal can be purchased additionally (see journal's website). For standing orders/subscriptions please contact the Managing Editor.
