

# Contents

1	<b>Description of two new species of <i>Ophiocordyceps</i>: <i>O. sinocampes</i> and <i>O. cystidiata</i> (Ophiocordycipitaceae, Hypocreales) from typical karst landform forests in Guizhou, China</b> <i>Zhong-Shun Xu, Li-ping Deng, Hai-Yan Wang, Hui-Ling Tian, Jiao-Jiao Qu, Yong-dong Dai, Xiao Zou</i>
29	<b>Four new species of <i>Erioscyphella</i> (Leotiomyces, Helotiales) from southwestern China</b> <i>Le Luo, Kandawatte W. Thilini Chethana, Qi Zhao, Hong-Li Su, Cui-Jin-Yi Li, Vinodhini Thiyagaraja, Fatimah Al-Otibi, Kevin D. Hyde</i>
49	<b>Phylogeny and phenotype of <i>Filobasidium</i> revealing three new species (Filobasidiaceae, Filobasidiales) from China</b> <i>Chun-Yue Chai, Zhi-Wen Xi, Qiu-Hong Niu, Feng-Li Hui</i>
67	<b>Three new species and a new record of <i>Conocybe</i> section <i>Pilosellae</i> (Bolbitiaceae, Agaricales) from Jilin Province, China</b> <i>Han-bing Song, Tolgor Bau</i>
95	<b>A new psychrophilic yeast of Kriegeriaceae (Kriegeriales) isolated from lichen in the Arctic, with the description of <i>Lichenia svalbardensis</i> gen. et sp. nov.</b> <i>Yukun Bai, Zeyu Tang, Xiaoya Peng, Jun Huang, Mingjing Sun, Jia Liu, Fang Peng</i>
115	<b>Four new species of <i>Pichia</i> (Pichiales, Pichiaceae) isolated from China</b> <i>Liang-Chen Guo, Shuang Hu, Hai-Yan Zhu, Yu-Jie Shang, Yan-Jie Qiu, Zhang Wen, Shen-Xi Chen, Feng-Yan Bai, Pei-Jie Han</i>
133	<b>Morphological characteristics and phylogenetic analyses reveal five new species of Hymenochaetales (Agaricomycetes, Basidiomycota) from southwestern China</b> <i>Yunfei Dai, Qi Yuan, Xin Yang, Rui Liu, Defu Liu, Haisheng Yuan, Changlin Zhao</i>
177	<b>Morphological characteristics and phylogenetic analyses revealed five new species (Basidiomycota) from Southwestern China</b> <i>Ali Yang, Lu Wang, Yongjun Hu, Yingtao Jiang, Guiying Shi, Changlin Zhao</i>
213	<b>Three new species of <i>Peroneutypa</i> (Diatrypaceae, Xylariales) and a first record of <i>Eutypa camelliae</i> in China with updated description</b> <i>Xinying Mao, Kamran Habib, Rizwana Zulfiqar, Hongde Yang, Yingqian Kang</i>
239	<b>Three new species of <i>Gerronema</i> (Agaricales, Basidiomycota) from southern China</b> <i>Wei-Xin Zhang, Wang-Qiu Deng, Chang-Qing Chang, Ping Zhou, Min Lin, Ming Zhang</i>
259	<b><i>Sticta flakusiorum</i> and <i>S. kukwae</i>—two additional new species from the Neotropics (Peltigerales, Peltigeraceae)</b> <i>Emilia Anna Ossowska, Bibiana Moncada, Robert Lücking, Emmanuel Sérusiaux, Nicolas Magain</i>
277	<b><i>Lijiangomyces laojunensis</i> gen. et sp. nov. (Mytiliniidiaceae), and <i>Sclerococcum stictae</i> (Dactylosporaceae), a new lichenicolous species from Yunnan, China</b> <i>Qingfeng Meng, Paul Diederich, Vinodhini Thiyagaraja, Damien Ertz, Xinyu Wang, Natsaran Saichana, Kevin D. Hyde, Ruvishika S. Jayawardena, Shaobin Fu</i>
299	<b>Unveiling four new taxa and <i>Nigrosynnema natarajanensis</i> comb. nov. in Stachybotryaceae (Hypocreales) from monocotyledon plants in Guangdong Province, China</b> <i>Chunfang Liao, Mingkwan Doilom, D. Jayarama Bhat, Kandawatte Wedaralalage Thilini Chethana, Khanobporn Tangtrakulwanich, Yunhui Yang, Fatimah Al-Otibi, Kevin D. Hyde, Wei Dong</i>
329	<b>Annotated checklist of arthropod-pathogenic species in the Entomophthoromycotina (Fungi, Zoopagomycota) in North America</b> <i>Ann E. Hajek, Kelsey L. Scott, Sergio R. Sanchez-Peña, Cezary Tkaczuk, Brian Lovett, Kathryn E. Bushley</i>
367	<b>Four new species of <i>Cryptothecia</i> (Arthoniaceae, Ascomycota) and <i>Myriostigma</i> (Arthoniaceae, Ascomycota) from China, based on morphology and molecular phylogeny</b> <i>Junxia Xue, Zihao Yang, Ruotong Li, Lulu Zhang</i>

*Gerronema pubescence* Ming Zhang & W.X. Zhang, sp. nov.

## FOCUS AND SCOPE

**MycoKeys** is a peer-reviewed, open-access, rapidly disseminated journal launched to accelerate re-search and free information exchange in taxonomy, phylogeny, biogeography, evolution and ecology of Fungi (incl. lichens). **MycoKeys** aims to apply the latest trends and methodologies in publishing and preservation of digital materials to meet the highest possible standards of the cybertaxonomy era. **MycoKeys** will publish papers on the monophyletic kingdom Fungi containing taxonomic or ecological data on any taxon of any geological age from any part of the world with no limit to manuscript size.

**MycoKeys** will consider for publishing works on the following topics:

- descriptions of new taxa, if they are accompanied with proper diagnoses, keys and/or distinction from close relatives or similar taxa
- taxonomic revisions of extant (or "recent") and fossil plant groups
- checklists and catalogues
- phylogenetic and evolutionary analyses
- papers in descriptive and/or historical biogeography
- methodology papers
- data mining and literature surveys
- monographs, conspecti, atlases
- collections of papers, Festschrift volumes, conference proceedings

Papers containing **identification keys** will be accepted with priority. Extensive manuscripts consisting mostly of keys will be considered for publishing as well.

ISBN numbers will be assigned to large monographic papers (i.e., major revisions of taxa), monographs, collections of papers, Festschrift volumes, atlases, checklists, conspecti.

All content is Open Access distributed under the terms of the *Creative Commons Attribution License*, which permits unrestricted use, distribution, and reproduction in any medium, provided the original author and source are credited. Authors are thus encouraged to post the pdf files of published papers on their homepages or elsewhere to expedite distribution.

## AUTHOR GUIDELINES

Authors are kindly requested to submit their manuscript *only* through the online submission module at <https://mycokeys.pensoft.net>. In case of difficulties with the submission procedure, please contact [mycokeys@pensoft.net](mailto:mycokeys@pensoft.net). Full text of author guidelines is available at: <http://mycokeys.pensoft.net/about#AuthorGuidelines>

## EXCERPTS FROM THE GUIDELINES

**BODY TEXT.** All papers must be in English, checked by a native English-speaking colleague (if author(s) is/are not native English speaker(s)). Write with precision, clarity, and economy: use the active voice and first person whenever appropriate.

**WEB (HTML) LINKS.** Authors may include links to other Internet resources in their article. This is especially encouraged in the reference section. When inserting a reference to a web-page, please include the **http://** portion of the address.

**CITATIONS WITHIN THE TEXT.** Citations within the text: Before submitting the manuscript, please check each citation in the text against the **References** and vice-versa to ensure that they match exactly. Citations in the text should be formatted as follows: Smith (1990) or (Smith 1990), Smith et al. (1998) or (Smith et al. 1998) and (Smith et al. 1998, 2000; Brock and Gunderson 2001; Felt 2006).

**REFERENCES.** It is important to format the references properly, because all references will be linked electronically as completely as possible to the papers cited. It is desirable to add a **DOI** (digital object identifier) number for either the full-text or title and abstract of the article as an addition to traditional volume and page numbers. If a DOI is lacking, it is recommended to add a link to any online source of an article. Please use the following style for the reference list:

**Published Papers:** Smith AR, Pryer KM, Schuettelpelz E, Korall P, Schneider H, Wolf PG (2006) A classification for extant ferns. Taxon 55(3): 705–731.

**Accepted Papers:** Same as above, but "in press" appears instead the year in parentheses.

**Electronic Journal Articles:** Agosti D, Egloff W (2009) Taxonomic information exchange and copyright: the Plazi approach. BMC Research Notes 2: 53. <https://doi.org/10.1186/1756-0500-2-53>

**Paper within conference proceedings:** Kress WJ, Specht CD (2005) Between Cancer and Capricorn: phylogeny, evolution, and ecology of the tropical Zingiberales. In: Friis I, Balslev H (Eds) Proceedings of a symposium on plant diversity and complexity patterns – local, regional and global dimensions. Biologiske Skrifter, The Royal Danish Academy of Sciences and Letters, Copenhagen, 459–478.

**Book chapters:** Mayr E (2000) The biological species concept. In: Wheeler QD, Meier R (Eds) Species Concepts and Phylogenetic Theory: A Debate. Columbia University Press, New York, 17–29.

**Books:** Heywood VH, Brummitt RK, Culham A, Seberg O (2007) Flowering Plant Families of the World. Kew Publishing, 1–424.

**Book with institutional author:** International Commission on Zoological Nomenclature (1999) International code of zoological nomenclature. Fourth Edition. London: The International Trust for Zoological Nomenclature.

**PhD thesis:** Stahlberg D (2007) Systematics, phylogeography and polyploid evolution in the *Dactylorhiza maculata* complex (Orchidaceae). PhD Thesis, Lund University, Sweden.

**Link/URL:** BBC News (2019) Plants 'can recognise themselves'. [http://news.bbc.co.uk/earth/hi/earth\\_news/news-id\\_8076000/8076875.stm](http://news.bbc.co.uk/earth/hi/earth_news/news-id_8076000/8076875.stm)

**CITATIONS OF PUBLIC RESOURCE DATABASES:** It is highly recommended all appropriate datasets, images, and information to be deposited in public resources. Please provide the relevant accession numbers (and version numbers, if appropriate).

Examples of such databases include, but are not limited to:

- IPNI ([www.ipni.org](http://www.ipni.org))
- Morphbank ([www.morphbank.net](http://www.morphbank.net))
- Genbank ([www.ncbi.nlm.nih.gov/Genbank](http://www.ncbi.nlm.nih.gov/Genbank))
- BOLD ([www.barcodinglife.org](http://www.barcodinglife.org))

Providing accession numbers to data records stored in global data aggregators allows us to link your article to established databases, thus integrating it with a broader collection of scientific information. Please hyperlink all accession numbers through the text or list them directly **after the References** in the online submission manuscript.

**INTERNATIONAL CODE OF NOMENCLATURE FOR ALGAE, FUNGI, AND PLANTS.** **MycoKeys** will publish papers that strictly adhere the rules of the last edition of the *International Code of Nomenclature for algae, fungi, and plants*. Descriptions of new taxa (species and below) should include the following: 1) a short Latin diagnosis followed by a full description in English, 2) an illustration (line drawing or photograph) clearly showing the diagnostic characters, 2) a comparison of the new taxon with related taxa, a diagnostic key to identification of species-group members, or at least to the closest relatives is highly desirable and may be requested by the editors 3) a discussion of the distinctive morphological characteristics, ecology, geography, and/or reproductive biology, and 4) a statement on preliminary [at least] conservation status for the taxon being described.

**OPEN ACCESS FEES.** Publication fees in open access journals ensure a barrier-free distribution of your paper at no charge for the readers and include costs involved in processing, formatting, publishing, indexing and archiving your paper.

The journal charges Open Access Publication Fee of EURO 15 per page for papers of less than 100 printed pages. Please visit the "Discounts and Waivers" section at <http://www.pensoft.net/journals/mycokeys> to learn more of our discount and waiver policies.

**PRINTED VERSION.** Offprints and printed issues of the journal can be purchased additionally (see journal's website). For standing orders/subscriptions please contact the Managing Editor.
